

## Preface

BioMIC 2021 - The 4th International Conference on Bioinformatics, Biotechnology, and Biomedical Engineering is an annual meeting organized by Badan Penerbit dan Publikasi of Universitas Gadjah Mada (BPP UGM), Yogyakarta, Indonesia. This year's conference was held on 6–7 October 2021. The scientific symposium program consisted of plenary sessions and parallel sessions and included the following topics: Bioinformatics and Data Mining; Biomedical Sciences and Engineering; Biomolecular and Biotechnology; Drug Development and Nutraceutical; as well as Big Data for Public Health Policy.

We are grateful for the support of the faculties in the Universitas Gadjah Mada which scientifically supported the conference from the reviewers until the editing of the papers published in the BIO Web on Conferences proceeding. The BioMIC 2021 had about 120 attendees including the presenters and participants. Among those, the conference received 121 submitted papers and all papers were subjected for at least 2–3 reviews by experts on the related topics. For this, only 28 papers were selected for publications.

We believed that during the two days conference, we had enabled to facilitate plenty of networking opportunities and provided the participants with the opportunity to meet and interact with the leading scientists and researchers, friends as well as colleagues. We hope that this proceeding will be beneficial for the development of life science in general and biological sciences and public health in particular.
