

Dear Participants,

Good morning/afternoon/evening! I am pleased to welcome you all to the 2nd Trunojoyo Madura International Conference which brings together the best thinkers and practitioners from all over the world to explore important issues in today's global context.

Your presence here is an important milestone in strengthening the global collaboration network, and I am very honored to be part of this gathering of brilliant minds. The conference, held in a land rich in Madurese's history and culture, is a great place to share knowledge, stimulate discussion, and encourage the innovation needed to achieve sustainable progress.

The theme of this conference, "Solving Real World Problem with Creativity and Collaboration Based on Science, Technology and Humanity", became a solid foundation for exploring important aspects in various fields. From here we can delve deeper into the global challenges faced by our society.

Committee Chairman,

Dr. Sabarudin Akhmad, ST. M.T.
