

# **2025 10<sup>th</sup> International Conference on Energy Efficiency and Agricultural Engineering (EE&AE 2025)**

5-7 November 2025, Starozagorski bani, Stara Zagora, Bulgaria

## **Guest editors of the BIO Web of Conferences Proceedings:**

Prof. Dr Nicolay MIHAILOV, DHC

Prof. Valentin VLADUT, PhD

## **Preface**

Tradition is what makes a scientific event remarkable. And the conference on Energy Efficiency and Agricultural Engineering is being held for the tenth time in a row! The beginning was laid back in 2002, when Assoc. Prof. Chavdar Vezirov proposed to organize and hold an international scientific seminar with the participation of representatives from universities in South-Eastern Europe. In 2025 once again university professors, researchers, and business representatives meet to discuss the global challenges of the modern world in the field of energy and agriculture. The wide range of topics that the conference covers, such as precision agriculture, food safety, renewable energy sources, smart grid, circuits and systems, remote sensing, challenges in education, machine learning, etc., as well as the shared experience from research conducted in different countries are undoubtedly a contribution to overcoming the aforementioned problems.

This scientific event became possible thanks to the sense of solidarity and the desire to develop joint research of the academic community. But it also became possible thanks to the support of the business community in our country and the academic leadership of the University of Ruse "Angel Kanchev", for which we offer them our heartfelt gratitude and appreciation.

Dear friends, I believe that this wonderful corner of Sredna Gora, and the hospitality and dedication of the organizers will leave lasting and wonderful memories of this conference!

Sincerely yours,

Prof. Dr. Nicolay Mihailov, DHC

Chair of the EE&AE 2025 Conference
